

Tactical Drone Operations

There is no other way to say it than Unmanned Aerial Systems(Drones) are saving lives! If your department is looking to start a Drone program or if you are looking to enhance yours, this is a great course for you. This course will present a comprehensive overview of how to integrate drone platforms into your tactical operations.

Instructors will be from Fort Wayne Police Department and Allen County Sheriff's Office. Both of which have a well established SWAT Team and Drone Unit. We will cover uses for the drones during both Patrol and SWAT situations. If you have a drone please feel free to bring them. We will also have multiple drones to review and evaluate.
